

plissé

Product range :

Wall to wall carpets and area rugs.

Concept :

For this line, the idea is to give the illusion that the floor is in 3 dimensions while using 2 dimensional materials and technics.

To create this illusion, the photographs were designed with great emphasis on play with light and shadow.

This helped to highlight the various reliefs, embosses and textures.

Production technics :

The texture effects are printed on the carpet using a high definition dyeing technic that penetrates deeply into the fiber.

The backing is in woven textile on which we can add a layer of latex for more comfort and softness.

Dimensions :

The maximum dimensions of each image is 4m x 12m80 without any repeat.

There will only be repeats for bigger sizes than these.

So it is possible to cover a whole surface from wall to wall or to make area rugs.

Colour range :

There are 4 shades of coloured grays for each of our flooring designs.

Finishes :

This quality of carpet is certified fire retardant, anti static and stain proof. So perfect for use in public spaces.

In the case of area rugs, we can provide either a very discrete finish on the back or a more classic hemming as a frame.
