« Lights » : acoustic sliding panels

Made from dense natural felt, our sliding panels are excellent for reducing sound vibrations and providing heat retention by blocking out cold air.

The collection offers a selection of unique laser cut designs giving you the opportunity to personalise each project. The perforations create play with light and shadow, enhance the 3D effect of felt and offer ever-changing perception of surrounding space.

Our sliding panels are suitable for both private and corporate projects and can be used as space dividers, a replacement for doors or to hide away unsightly storage areas.

They can cover whole surfaces, or alternatively be used as punctuations within open plan spaces.

Designs : « milky way », « fire flies », « bubbles », « city lights », « cloud of flowers », « little windows », « rolling dice »

Mechanism : profile track system

Fabric : felt in 3mm thickness

Material : 100% wool - density 300gr/m² - weight 900gr/m²

Properties : thick, porous & flexible
soft touch
excellent sound & air absorbent
water repellent
fire retardant
opaque to light

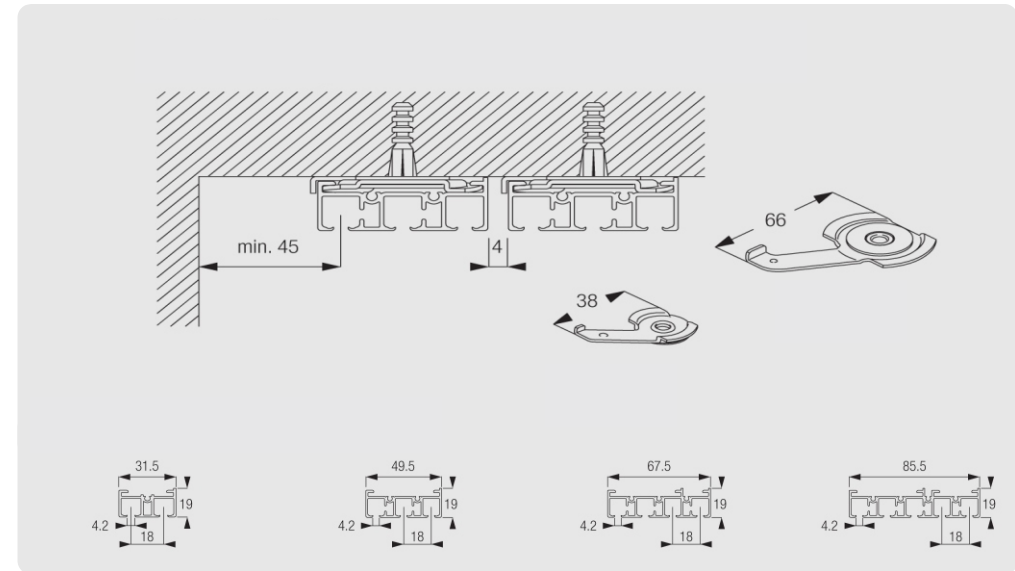

Dimensions : made to measure

Couleurs : 45 colours available

Classement : naturally fire retardant
extra treatment on surface possible

Entretien : brush off or Hoover to remove dust
dry clean to remove stains
