

NAMAD XL wave curtains

Design : "namad" - XL wave curtain

Mechanism : curtain track

Fabric : felt in 2mm thickness

Material : 100% wool - density 300gr/m² - weight 720gr/m²

Dimensions : tailor-made

Colors : 48 colors available

Classification : naturally fire retardant

extra treatment on surface possible

Care instructions : Hoover to remove dust

dry clean to remove stains

Felt, an ancient and natural material that's perfect for modern life.

We only work with genuine felt made of 100% natural wool comprising of millions of fibres that are "mixed-in" together to form a non-woven textile surface.

Inherent properties of felt :

- Thick, porous and flexible
- Soft and tactile to touch
- Excellent sound and air absorbent
- Natural sound barrier and heat insulator
- High acoustic performance
- Water repellent and fire retardant
- Dense and thus opaque to light
- Without allergens nor VOC*

*Volatile Organic Components potentially noxious

Felt reduces effectively the acoustic energy that hits it in three different ways :

- Loss through friction
- Loss through vibration within the structure
- Loss through internal damping (shock absorption)

Physical and mechanical features of felt in terms of interior design applications :

- Sound comfort in interiors where there is too much resonance
- Heat comfort where there is need to block out cold air

Track system specifications :

In the case of
XL waves,
this distance needs
to be 120-150mm.
